

Shubhankhi Mohapatra

Product Designer

Bengaluru, India · shubhankhi31298@gmail.com · [Portfolio](#) · [LinkedIn](#)

Product designer with four years of enterprise systems experience at Accenture, working across complex workflows, business requirements and technical constraints. I bring systems thinking into consumer and B2B products, from early product definition through interaction design and prototyping.

EXPERIENCE

Accenture, Bengaluru, India Feb 2021 – Dec 2024

Senior Analyst (Jun 2024 – Dec 2024) · Analyst (May 2022 – May 2024) · Associate (Feb 2021 – Apr 2022)

Enterprise supply-chain and manufacturing systems across three global client engagements

- Gathered requirements with business and technical stakeholders and contributed functional designs and specifications for planning and production workflows, working with developers through build and validation.
- Supported releases across an S/4HANA upgrade, a feature release and a regional rollout, from implementation and configuration through testing, cutover and post-go-live support.
- Conducted integration, UAT and regression testing across end-to-end planning workflows and RICEFW objects, identifying issues and working with business and technical teams through resolution before release.
- Worked on the functional design of a forecast-upload feature and reporting enhancements for a North America planning rollout, partnering with business and technical teams through testing, documentation and user knowledge transfer.

SELECTED PRODUCT WORK — SELF-DIRECTED

Atelier Complex Systems · B2B SaaS

Designed a shared campaign-management system across Agency, Brand and Creator roles, including assignment-level lifecycle state, workflow-based attention cues, visibility rules, performance measurement and human-in-the-loop AI.

ToneMatch 0 → 1 Product Design · Beauty Tech

Designed a personalized beauty-discovery experience that turns complexion attributes into cross-brand makeup recommendations, foundation matching and a try-before-you-buy Discovery Kit.

Quest 0 → 1 Product Design · AI-Assisted Build

Designed the product logic, rules and experience for a gentler productivity game that restructures difficult tasks instead of punishing missed ones, using AI-assisted development to build and iterate on the concept.

BookMyShow UX Redesign · Ticketing

Redesigned four high-uncertainty ticketing moments—high-demand sales, cancellations, refunds and final pricing—around clearer communication of status, expectations and next steps.

EDUCATION

B.E. Information Science & Engineering

JSS Academy of Technical Education, Bengaluru · 2016–2020

Google UX Design Professional Certificate · CalArts Graphic Design Specialization

SKILLS

Design	Product Design · UX Research · Interaction Design · Prototyping · User Flows · Information Architecture
Product & Systems	Product Definition · Requirements · Workflow & State Modeling · Systems Thinking · Stakeholder Collaboration · UAT & QA
Build	AI-Assisted Prototyping & Development
Tools	Figma · Framer · Photoshop · Illustrator · After Effects · Jira · Notion
Enterprise	SAP S/4HANA · Production Planning (PP) · Materials Management (MM)
